

# BEACH UMBRELLA SAFETY

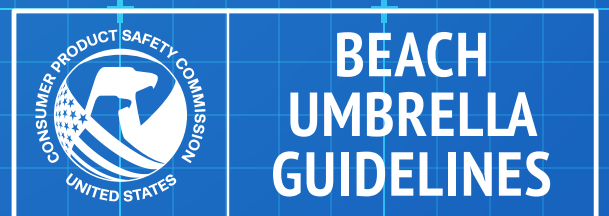

Airborne beach umbrellas can be dangerous, even deadly.  
Make sure your beach umbrella stays anchored in the sand!

## TIPS:

- Spike your beach umbrella into the sand.
- Firmly rock it back and forth until it's buried at least 2ft. deep.
- Tilt it into the wind to keep it from blowing away and injuring someone. (Diagram 1a)

From 2010-2018, an estimated 2,800 beach umbrella-related injuries were treated in ERs nationwide
